

3-Tier Solution

The BIOIONIX® three-tier technology acts as an artificial immune system that advances food safety.

Tier 1

PATHOGEN DESTRUCTION

BIOIONIX SuperOxidants™ safely destroy pathogens that flow through our first-tier patented chambers.

Tier 2

CONTINUOUS DISINFECTION

Release of an all natural, disinfection with controlled concentrations of hypochlorous acid (HOCl) circulates, providing continuous disinfecting properties that are 100 times stronger than bleach and safer to use and handle than other toxic chemicals.

Tier 3

FOOD SAFETY VALIDATION

The third tier and most important part of our patented Technology is the BIOSAIF24/7 Software. It's the brains of the artificial immune system that keeps everything in balance and operating 24/7, providing data intelligence.
